The author, starting from the idea of the ongoing transition from the dying industrial society to the new but still undefined society, explains in the first part the severe international crisis by highlighting the consequences of unregulated globalization. He then introduces the mechanisms of great speculation, the dominance of “Finance-capitalism”, the political responsibilities. He also emphasizes the need to create real democratic and functional supranational European and global bodies able to deal with the huge global emergencies which affect mankind: from the unfair distribution of wealth to the super power of the financial elites, from the expected ecosystem collapse to the “demographic bomb”, from the absurd, dangerous and expensive arms race to the new technologies, up to the constant violations of fundamental rights.

He therefore introduces the requests of the honest and outraged citizens, who are asked to mobilize for a “GLOBAL PEACEFUL REVOLUTION” (GANDHIAN) in order to reach a more human and fair society.

In the second part, the author introduces a courageous project that includes a series of concrete initiatives for building the NEW HUMANISM, and invites everyone to take part in the SHOCKWAVE that will lead to the NEW RENAISSANCE.

This target cannot be delayed anymore! The scientists’ alarm cry is in fact unanimous: the planet is on the brink and we must act before the middle of this century to avoid its collapse. What can we do? Some possible “WAYS OUT TO THE EMERGENCIES” are proposed: but we must act, all and from now, together with the civil society, to build a new human-centric and bio-centric civilization based on a “New Democratic Institutional Architecture” and on a “New International Ethical Economy”.

Everyone is asked to join the “MANIFESTO OF GLOBAL PEACEFUL REVOLUTION FOR A NEW HUMANISM” by participating to the initiatives on the website [www.unipax.org](http://www.unipax.org).

## 2 The operating progression

As **FIRST STEP**, it is essential to start a “PEACEFUL GLOBAL REVOLUTION” (GANDHIAN), an intense mobilization to deal, on the one hand, with the urgent environmental and cultural socio-economic emergencies, and on the other hand to draw new paths to be tested in a **SECOND STEP** called “NEW RENAISSANCE” during which we will start, in the shortest possible time, the democratization process of the UN system and we will define and propose at international level a draft of “WORLD REGULATION FOR CIVIL COEXISTENCE” that should be respected by all the inhabitants (residents) of the planet earth in their common interest.

It is a real Renaissance, a rebirth, essential to create together the backbone, “The Architecture of a New Humanism” to be realized, of course, in the necessary time.

THE BEGINNING AND THE SUCCESS OF A “NEW HUMANISM” IS THE **THIRD STEP**, OUR GOAL.

As a matter of fact, the three steps are absolutely interdependent and they must be started together and immediately with strong and clear requests and concrete goals. Only in this way, through a “SHOCK WAVE” capable of involving institutions thanks to the citizens and their associations, we can start the “GLOBAL PEACEFUL REVOLUTION”.

The three steps are necessary to a conceptual classification of concrete initiatives, but in reality it is a single process of Revolution, Renaissance and New Humanism at the same time.

**IN SUMMARY:** THE LAUNCH OF THE THREE STEPS MUST BE SIMULTANEOUS BUT THEIR DEVELOPMENT MUST BE DIFFERENT: THE FIRST STEP FOCUSES ON THE “REVOLUTION” PROPOSALS AND ON THE SUBSEQUENT PHYSICAL AND INFORMATICS MOBILIZATION, NAMELY THE REALIZATION OF THE SHOCK WAVE SO THAT THE “REVOLUTION” CAN INTEGRATE INTO THE SECOND STEP: THE “NEW RENAISSANCE” THAT, CONTINUING AND CONSOLIDATING THE REVOLUTION PROPOSALS, STARTS THE “NEW HUMANISM” WHOSE PRINCIPLES INFLUENCE EVERY STEP AND EVERY PROPOSAL SINCE THE BEGINNING.
